To whom it may concern.

I have worked with Tanya Fallenius on my feature film debut "Parents" where she edited the first draft while we were still shooting. She has been an invaluable part of the process. A fantastically dedicated collaborative partner, who delivered a first draft that already solved many of the films problems and offered original, sensitive and effective suggestions to the scenes.

I recommend Tanya highly as a film editor, both personally and professionally and I very much look forward to working with her again.

Best regards,

Christian Tafdrup  
Film director
